

About Us

At JP Precision Private Limited, we bring a rich legacy of experience in the construction industry, backed by a strong foundation of technical expertise and quality-driven practices. We specialize in delivering high-performance RCC precast solutions that meet the evolving demands of modern infrastructure. Driven by an energetic and knowledgeable team, our working style emphasizes precision, efficiency, and hands-on involvement at every stage of execution. Strategically located at the heart of the region.

Our Vision

JP Precision Private Limited is an emerging name in the RCC precast industry, committed to delivering excellence through precision engineering. With a strong foundation of young, energetic leadership, the company blends innovation with experience on the ground. Our team's deep understanding of materials and processes ensures reliable and high-performance products. We continuously evolve to meet the growing demands of infrastructure development.

Our Mission

Deliver precision-driven RCC manufacturing with uncompromising quality standards. Ensure structural strength, dimensional accuracy, and project-ready performance in every product. Build lasting partnerships through integrity, efficiency, and execution excellence.

...Why Us...

- High Production Capacity with 70000 - 80000 Pipes Annually.
- Strategic Location Advantage at the Heart of Industrial Connectivity.
- Efficient & Reliable Logistic Support.
- State-of-the-Art Infrastructure & Advanced Manufacturing Systems
- Energetic & Technically Skilled Team.
- Customer-Centric Approach with Flexible Solutions.
- Transparent & Professional Business Practices.
- High Dimensional Accuracy & Superior Product Finish.
- Optimized Curing Process for Faster Turnaround.
- State Of Art Vertical Vibrator Casting Machine.

Our Products

RCC Pipes

Precision-engineered NP3 & NP4 RCC pipes (600 mm to 2200 mm) manufactured using advanced vertical vibration technology. Delivering superior strength, dimensional accuracy, and long-term performance.

RCC Precast Box Culverts

High-strength box culverts up to 2000 × 2000 mm, cast as a seamless single-piece unit. Designed for faster installation, enhanced durability, and dependable structural performance.

RCC Precast U Shape Channel Section

Custom-designed U-shaped drainage channels, precast to suit diverse site requirements. Ensuring efficient water flow, easy installation, and long-lasting reliability.

RCC Precast Manholes & Chambers

Engineered in modular sections—Base, Riser, and Cone—for flexible site adaptability. Providing robust construction, precision fitment, and ease of assembly.

RCC Cable Trench

Precast cable trench systems for organized and efficient cable management. Reducing construction time while ensuring durability, safety, and streamlined infrastructure.

JP PRECISION PVT. LTD.
